

The history of golf tees is a fascinating journey from improvisation to innovation. In the early days of golf, players would fashion sculpt mounds of sand or dirt to elevate the ball off the ground for an increase in accuracy. This rudimentary practice changed in the late 19th century with the invention of the first commercial golf tee.

# from TREE to TEE

The simple wooden peg, revolutionized the game by standardizing the height and consistency of golf ball placement, which improved accuracy and play. To day, golf tees come in various materials and designs, but they all trace their origins back to these early innovations.
